Dominique "Nikki" Mounce `Web Developer`

My name is Dominique Mounce, but you can call me Nikki! I am a Full-Stack Developer, fresh out of the UC Davis Coding Bootcamp program, eager to enter the world of programming in the field of UI/UX or Front-End Development. My previous work experience makes me a great contender in that I am efficient, sedulous, passionate, and dedicated to my work. My technical training with CSS, JavaScript, React and other languages makes me a perfect fit for any role and I am highly adaptable and eager to learn new things.

My commitment to my work speaks for itself.

Projects (All projects are part of UC Davis bootcamp program)

Ubiquitous Happiness
Collaborator- UI/UX

Ubiquitous Happiness is a Video Game community forum that features new release game advertisements, leverages the Twitch API to display featured streamer game clips and links to the gamers Twitch profile, and most importantly an open blog forum for like-minded people to come together.

Repo: github/Myuze/ubiquitous-happiness.git   *Deployed:* ubiquitous-p2.herokuapp.com/home

E-Commerce
Back-End Development

E-Commerce is an internet retail application that was modified from starter code and configured to work with the Express.js API, using Sequelize to interact with the MySQL database. This application is invoked using Insomnia, allowing for route verification.

Repo: github/Nmounce/E-Commerce_Back-End   *Deployed: watch.screencastify.com/v/2dcVTf168klgN2rD12D*

Mellifluous
Collaborator

Mellifluous is a search application that allows users to search for songs by name, artist or lyrics. The search results populate 10 items based on relevance of the search criteria and each result card features a gif (leveraging giphy API) relevant to a keyword. You can then navigate to the Genius webpage for the song or artist and view the song lyrics, artist bio, etc.

Repo: github/Nmounce/project-01   *Deployed: nmounce.github.io/project-01*
